

# Ghosts in the Graveyard

## HIDE AND SEEK FOR SNEAKY GHOSTS!

There are 50 Tombstones in the graveyard. Each player is a ghost hiding behind one!

At the start of the game, each player gets 3 secret locations from the 50 possible tombstones. Two secrets will be decoys and one will be their special 'haunt' hiding space.

Using tombstone cards numbered 1-to-50, several fun 'flash light' cutouts, along with some special abilities, players will narrow down opposing secrets, careful not to reveal too much about their own.

Shine light on the competition first in this spooky-themed family-weight deduction race.

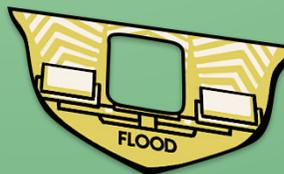

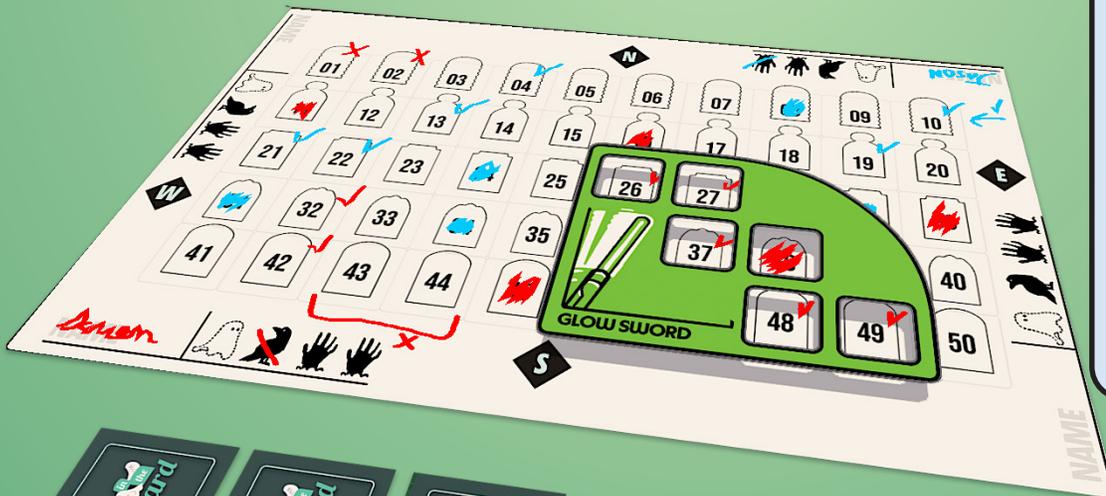

- Deduction
- Spatial Puzzling
- Hidden Information

## COMPONENTS

- 50 Tombstone Cards
- 1 Dry-Erase Graveyard
- 4 Dry-Erase Markers
- 6 Personal Flashlights
- 1 Flood Light
- 4 Secret Shields

## WHAT'S SPECIAL?

- All players make their notes directly on the dry-erase graveyard, in public, allowing games to end with a shared gameboard filled with charming note-taking chaos.
- The 50 Tombstones add a countdown to the game. One is typically used each turn to facilitate the search, allowing players to know that no secret can be there. The game starts wide open and ends very tight with exciting risks and dramatic reveals.
- The searches always reference ALL 3 opposing secrets, not just the special "haunt" secret, so players can use their decoys to mislead.
- Clever manipulation of the toyetic light sources can quickly eliminate large parts of the graveyard. Use them well!
